Ambon Complex (7th-9th
Floor), 99 Mohakhali C/A,
Dhaka - 1212, Bangladesh

Dear Mr. Ehasanul,

As a recent graduate from BRAC University with a Bachelor of Science in Computer Science, I am extremely interested in the Junior Software Engineer opportunity posted on the Bdjobs website. After reviewing the key qualifications for this role, I am confident that I am well-prepared to be a valuable contributor to company growth and success.

Through my academic journey, I applied a strong focus on building my coding and problem solving abilities. I am detail-oriented and meticulous when managing competing priorities within tight deadlines. I work best in roles where utilizing my teamworking abilities allows me to make a positive impact while using creative problem-solving to resolve issues and achieve goals.

My academic strengths have greatly contributed to the development of my observation, critical thinking and teamwork skills. I bring clear and effective communicating to build professional connections with co-workers, management and customers. I would welcome the opportunity to further discuss the details of my experience and attributes which I believe will be an asset to the Datapath team.

As a fresher my salary expectation is lower. I do not not have much experience regarding .NET but I can assure you this that I will try my level best to learn and always open to new ideas. I will be dedicated and passionate to learn anything that is necessary for the task to be completed within the given time, so my salary expectation is within the range of 20000-25000 BDT.

Please review my attached resume for additional insight into my background. Thank you for your time and consideration.

Respectfully,
Sayed Bin Taher
